Dear Danielle,

As the Director of Undergraduate Admissions at UWM, I am writing to express my support of the Insight program in the Pewaukee School District. Based on the information shared with me about the program, I'm confident that the students who participate in Insight will be better prepared for success at the collegiate level. Moreover, given the academic requirement of a 3.7 GPA or higher for entry into the program, as well as the connection to a business mentor in a profession of interest, I believe Insight is one of many unique programs offered throughout Wisconsin and around the country that truly set participants apart from their peers.

The committees that review applications for admission and scholarship purposes will look favorably on students' participation in Insight, and we welcome the opportunity to partner with the Pewaukee School District in support of this program.

In direct support of your program, our office is pleased to have representatives available for program visits and presentations from our Lubar School of Business, Honors College, Undergraduate Admissions, and any additional faculty or staff from UW-Milwaukee that might be helpful in connecting your students with our outstanding academic programs. Additionally, we would welcome the opportunity to host Insight participants for campus visits, and other unique opportunities that may present themselves.

Thank you again for sharing information about the Insight program. Please don't hesitate to let me know how UW-Milwaukee can partner with Insight to support your students and promote their success in high school, college, and beyond.

Sincerely,

A handwritten signature in blue ink, appearing to read "Brian Troyer", with a long, sweeping underline that extends across the signature area.

Brian Troyer  
Director, Office of Undergraduate Admissions
