

BACKGROUND

Launched in 2015, Insight is a transformation of the high school experience that places students in professional settings while earning credits in rigorous courses uniquely designed to assist students to learn and develop skills for high-demand careers. With a combination of high-quality, authentic instruction, community-based projects & clinicals, and personalized mentors in a field of interest, Insight supports future-ready learners, helping them accrue professional networks, relevant experiences, post-secondary credits and industry certifications prior to graduation.

OUR VISION

Since its inception, Insight has transformed the way that Pewaukee learners acquire and apply their knowledge and skills. Building upon this foundation, Insight continues to grow, and its influence is felt and observed within classrooms, across departments, and beyond our community. As we expand Insight opportunities each year, the impact is felt on our district strategic plan, influencing our vision for ALL learners in the future, ensuring that they are Future-Ready.

CURRENT COURSE STRANDS:

Course strands are developed based on student career interests and projections of local labor market needs. Since our launch in 2015, Insight has continued to add additional courses and opportunities for our learners.
